

Door Tablet NXT

Workspace Signage Touch Display

Our slim, streamlined, purpose-built display is placed outside your meeting spaces

Easy to install

Works “out of the box” and comes with all the fixtures and fittings needed. It’s easy to mount on any surface including glass, brick, plaster and metal. The device comes with a security lock, built-in.

Sturdy

The screen is Antimicrobial Corning® Gorilla® glass which means it is tough, easy to clean and will not shatter, crack or deteriorate excessively with time or heavy use. It’s built to last and stay looking good.

Power over Ethernet (PoE+) Built-in

With no need to rely on Wi-Fi signals, a single PoE+ cable powers the NXT, giving you the important benefit of full power management to save costs and the environment. Shut down and restart screens as needed.

Readable at Wide Viewing Angles

The IPS display ensures the screen can be read comfortably at a distance and at wide angles, so there’s no need to get up close to read what’s being displayed.

Attractive

It is sleek and slim (2cm deep) with a 10.1” high resolution (1920 x 1200 dpi) full colour touchscreen so the display is easy to read and provides smooth interaction. Add your branding and make the device yours.

LED Lights on Front & Sides

A bright and colourful LED light strip on the front of the Door Tablet NXT signals that a room is free or busy and is visible from a distance - so there is no need to walk up to a room to see it’s status.

Features

CPU	ARM Quad-core Cortex-A55 up to 2.0GHz (64 bit)
Memory	2GB LPDDR4
Storage	32GB eMMC
